Virtual Root Cause Analysis Workshop: Managing Adverse Events

This 8-hour workshop will provide participants with the knowledge and strategies to establish a standardized approach to managing patient safety events, including sentinel events. Taught by trained experts in quality, safety, and accreditation from Joint Commission International (JCI), the workshop offers interactive presentations using case studies and team-based activities to share information and develop the competencies needed for conducting a root cause analysis (RCA). All participants will receive a complimentary copy of “Root Cause Analysis in Health Care: A Joint Commission Guide to Analysis and Corrective Action of Sentinel and Adverse Events, 7th Edition,” (a $129.00 value).

At the end of this workshop, you’ll be able to:
- Define the organizational requirements for conducting an effective root cause analysis
- Describe the JCI Accreditation Standards specific to identifying and managing patient safety events
- Follow the steps for managing adverse events
- Apply root cause analysis tools

WHO SHOULD ATTEND
Healthcare professionals who are interested in gaining knowledge and skills about quality, safety and accreditation, including:
- Quality professionals
- Patient safety professionals
- Accreditation professionals
- Physicians
- Nurses
- Directors and Managers
- Risk Managers
