

Tracers with AMP[®]

The premier patient safety platform for continuous accreditation readiness, digital tracing, and rounding.

A digital platform to help optimize your organization

Maintaining accreditation compliance can be challenging, allow our platform to streamline this process and help your organization achieve operation excellence.

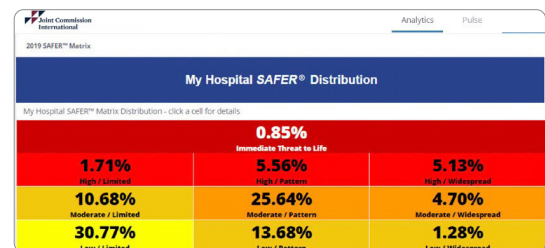

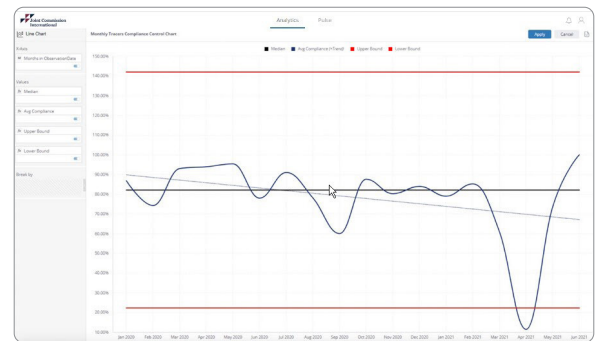

As a leading quality and patient safety improvement organization, we have developed a robust platform to help you address these challenges. Tracers with AMP enables organizations to efficiently collect, analyze, and visualize real-time data. Save time by accessing user-friendly interactive dashboards and easy-to-build automated reports. The insights from these dashboards and reports will help you proactively identify risk areas and prioritize improvements.

Safe patient care depends on the right data and the right decisions. With our integrated business intelligence platform, you can make data-driven decisions that have the most impact on your organization. Whether your organization is committing to accreditation for the first time or is already accredited, Tracers with AMP can help you take the next leap forward to becoming a high reliability organization.

This web and mobile platform helps your organization collect and aggregate data for:

- Joint Commission International Standards
- Rounding activities related to patient safety, nursing, facilities management, infection prevention, leadership, and more

Through our business intelligence platform, *Illuminate Analytics™*, data collected in Tracers with AMP can be analyzed and aggregated. Additionally, *SAFER®* Matrix data from the AMP platform can be analyzed with the Tracer data, giving you a complete picture of your organization's accreditation readiness. This tool also provides compelling visualizations to help draw meaningful, actionable conclusions which can strengthen the quality and safety of the care you provide.

Transforming your work with Tracers with AMP®

1

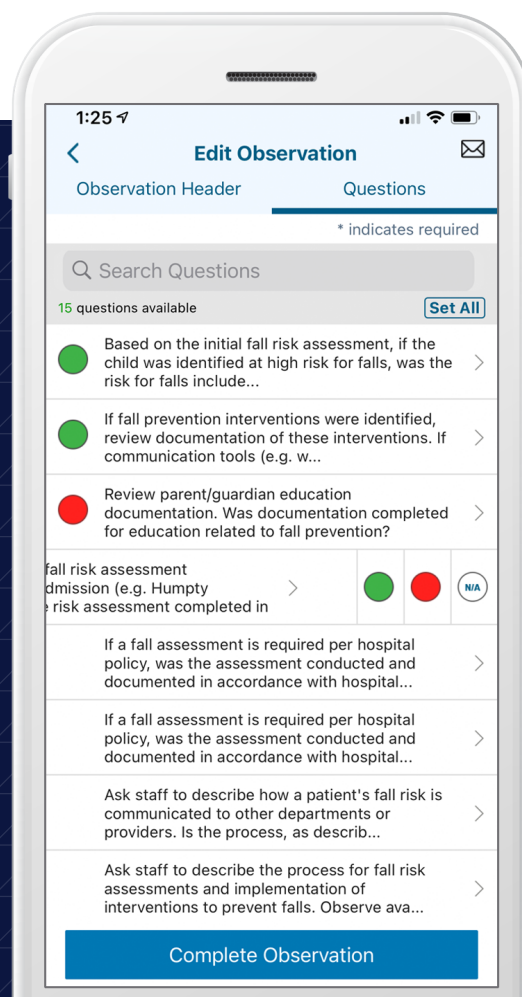

MAINTAIN CONTINUOUS COMPLIANCE

Tracers with AMP contains a comprehensive set of tracer questions that are linked to Measurable Elements (MEs), which helps you track data for Joint Commission International accreditation readiness. Leverage the existing library or create customized tracers specifically for your organization. Based on these tracer questions, you can create robust reports that help your team determine trends in the data and the most pressing issues across your organization.

TRACERS WITH AMP® MAKES STAYING IN COMPLIANCE EASIER

- Leverage a comprehensive set of tracers questions linked to Measurable Elements (MEs)
- Create customized tracers that are tailored for your organization's needs
- Analyze robust reports derived from tracer data in Illuminate Analytics® business intelligence platform
- Track plans of action

The mobile app allows you to optimize tracer usage throughout your Organization—quickly add notes via a voice-to-text feature and upload photos directly to reports.

2 FACILITATE DATA-DRIVEN DECISIONS

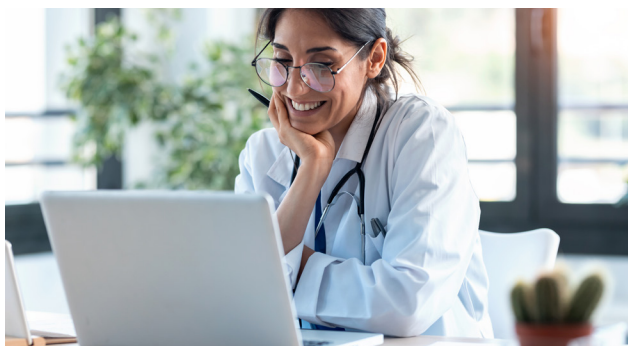

Tracers with AMP enables you to streamline reporting using aggregated data from multiple sources. Build interactive reports and dashboards to view and analyze the data. Quickly identify key performance indicators and drill down to gather additional insights or predictive trends, which will help you to better understand your data so you can make the best decisions to improve patient safety.

BETTER UNDERSTAND YOUR DATA SO YOU CAN MAKE THE BEST DECISIONS

- Digitally manipulate data
- Pinpoint risk areas
- Identify root cause factors
- Prioritize areas for improvement
- Effectively allocate available resources
- Document changes
- Monitor progress

3 CREATE EFFICIENCIES AND SAVE TIME AND MONEY

Go beyond accreditation by using a single platform to collect and view data across departments and locations. Tracers with AMP enables multiple teams or departments to work together to standardize patient safety processes and document data for quality projects. Consolidate your data collection systems with our integrated platform and achieve operational excellence with accreditation and beyond.

USE ONE INTEGRATED PLATFORM ACROSS DEPARTMENTS & LOCATIONS

- Prioritize time by quickly identifying risk areas vs. high-performing areas
- Identify best practices and standardize across your system
- Create and assign tasks to facilitate actionable workflows
- Monitor, measure, and create reports for key quality indicators

4 ENHANCE COMMUNICATION

Tracers with AMP allows your organization to standardize your accreditation readiness process and delegate your tracer scoring assignments. Additionally, you can manage follow-up tasks within the Tracers platform. This data fuels our built-in reporting platform, which creates transparency and increases communication by providing automated reports for your governing board, leadership, and frontline staff. Bridge silos across your organization to improve collaboration in areas such as quality, compliance, environment of care, infection prevention, and pharmacy.

ENHANCE COMMUNICATION ACROSS YOUR ORGANIZATION

- Schedule tracer frequency by site
- Assign tasks that require follow-up actions
- Assign tracers to staff and delegate scoring assignments

Identify risk, make improvements, sustain excellence

✓ **COLLECT THE DATA**

- Determine data to be collected through a library of customizable questions
- Schedule data collection frequency
- Use observation forms to collect data and use the mobile app for convenience

✓ **UNDERSTAND THE DATA**

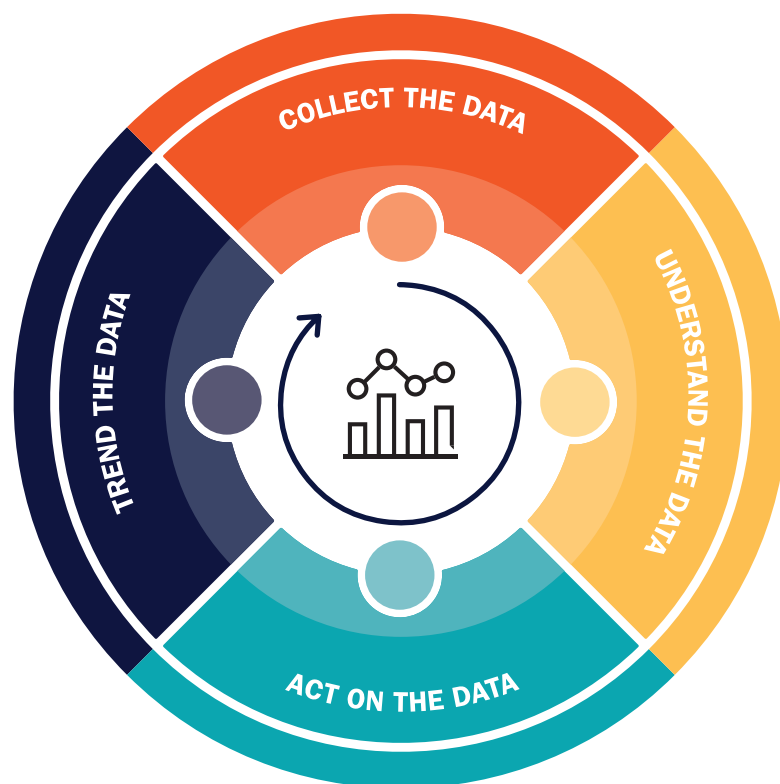

- Create custom dashboard views
- Analyze data with interactive dashboards
- Identify risk areas

✓ **ACT ON THE DATA**

- Allocate available resources
- Set up automated notifications
- Assign tasks where follow-up and a call to action is necessary

✓ **TREND THE DATA**

- Utilize reports and dashboards to track trends and improvements

Tracers with AMP's unique advantages

- Access an electronic version of the JCI Standards that is automatically updated and assess your organization's compliance

- Standardize your tracer collection workflow and data analysis across your sites and system

- A library with hundreds tracer templates linked to measurable elements that are customizable to fit your organization's needs

- Business Intelligence platform (Illuminate Analytics™) which allows for real-time data analysis with compelling visualizations

- Ability to combine data from multiple sources, including data collected through the tool and SAFER® Matrix data via web-based platform and mobile apps

- Access to Clinical Advisors who are clinicians with a deep understanding of Joint Commission International standards, tracer methodology, and clinical workflows
